Fundação para a Ciência e a Tecnologia (FCT) encourages the association of Portuguese researchers and research units currently funded by FCT under various funding schemes (such as national and/or transnational calls for research projects, research units and research infrastructures), as well funded by other entities, to consortia applying for funds under this call.

FCT is not committing dedicated cash to this call.

Therefore, Portuguese participants in applying consortia must provide the Call Secretariat with a signed official letter of support from their Head of Department, Dean, or equivalent position, stating the commitment of their institution to participate in activities with already existing means. This letter must be included as an annex at the end of the proposal submission form.
